## 22.5" 1920 x 1200 monitor featuring IPS panel technology

The demanding data and application heavy world needs a display that creates a more productive work place. With 1920 x 1200 resolution, the XU2395WSU offers 11% more height with the same width as a Full HD display, which works much better for spreadsheets, word documents and browsing the Internet. The IPS panel technology assures accurate and consistent colour reproduction with wide viewing angles. VESA mountable and ideal for dual display applications, the XU2395WSU is an ideal partner for an iiyama dual monitor arm or stand.

IPS

IPS technology offers higher contrast, darker blacks and much better viewing angles than standard TN technology. The screen will look good no matter what angle you look at it.

Flicker-free + Blue light

The ultimate solution for the comfort and health of your eyes. Flicker-free monitors with the blue light reducer function substantially reduce the strain and fatigue caused by flickering and blue light emittance of regular monitors.
