TOSHIBA

Taking photographs and sharing them with your friends and family has never been easier. Toshiba FlashAir™ transfers your images from your camera to any wireless enabled device, instantly. Simple.

The FlashAir™ SD card has embedded wireless LAN so you can automatically download images to your tablet, PC or smartphone without needing cables or adaptors. The 8,16 and 32GB Class 10 SD Card can be used exactly like a regular SD Card and so can be used in any digital camera with an SD Card slot.

Shoot and Share: Simple

❯ FlashAir™ - THE SIMPLE WAY TO SHOOT AND SHARE

WHAT IS FlashAir™?

FlashAir™ is more than a standard memory card. It offers embedded WLAN and creates its own Access Point accessible from other WLAN enabled devices. All data can be transmitted to your tablet, PC or smartphone without the need to remove the card or plug in a cable. The 8,16 and 32GB Class 10 SD Card can be used exactly like a regular SD Card with any SD capable digital camera.

INVENTOR OF FLASH MEMORY

CONNECTING TO THE WORLD

As wireless connectivity becomes more and more popular, users want a quick and easy way to share photographs and to transfer them to and from online storage services and social media. Toshiba's FlashAir™ enables you to enhance your experience with your digital cameras by creating a WLAN Access Point, independent from the existence of any other network. The communication works at home and as well outside. Wherever you are, you can connect to FlashAir™.

NEW INTERNET 'PASS-THROUGH'

The new firmware features an 'internet pass-through' mode that further simplifies photo sharing. Once a mobile device is connected to the FlashAir™ card, the internet pass-through functionality enables the device to access the internet via a wireless access point. This removes the need for users to swap between a WiFi connection and the FlashAir™ card when uploading images to social media sites.

SHARING WITH FRIENDS INSTANTLY

Connect your Smart Phone or Tablet via WLAN to the FlashAir™ card and download the pictures with a simple click. Share it with friends next to you or use your Smart Phone or Tablet to upload the images directly to social media platforms. With the new Photoshare function you can select who can connect to your FlashAir™ card and which pictures are visible for them.

EASY WAY TO COMMUNICATE

To view the pictures stored on the FlashAir™ card, simply use your standard Browser or download the free app for Android and iOS.

GET IT ON Google play   **Available on the App Store**

POWER SAVING

Optimised for battery powered devices, the stand-by function ensures the wireless capabilities are only on when needed reducing the power consumption.

FlashAir™ Specifications		
Card capacity		8GB, 16GB, 32GB
Speed Class		Speed Class 10
Compliant standard		SD Memory Card Standard Ver.4.00
Wireless LAN Standard		IEEE802.11 b/g/n
Wireless LAN Security		WEP, TKIP, AES (WPA, WPA2) WPA2 Default
Product requirements	DSC	DSC compatible with SDHC™ Memory Card
	OS (for config)	Windows XP/ Vista/7, MAC-PC, Android, iOS
	Browser	Internet Explorer, Safari, etc
Applicable formats		Various data formats (.jpg, .mpg, .raw etc)
Power Supply Voltage		2.7 - 3.6V
Operating Environment		Temperature: -25 to 85°C Humidity: 95%RH (at 25°C, no condensation)
Exterior Dimensions		32.0mm(L)×24.0mm(W)×2.1mm(T)
Weight Approx.		approx. 2g
