Ultimate Big Screen Viewing Experience

Introducing Optoma Screens

Optoma offer a wide selection of quality front projection screens suitable for any situation, from small meeting to large conference rooms and great for home cinema applications.

All Optoma screens are built to a high standard and are rigorously checked and tested throughout the production process to ensure the highest possible build quality and finish.

Optoma's unrivalled understanding of both the market place and emerging technologies has allowed us to use our expertise to further expand our product offering to cater for every requirement, whilst still delivering great value.

The screens are available in several styles including wall/ceiling mountable, manual pull-down and electric with In-Site I/R, and portable lift all in Matte White 1.0 gain.

Optoma screens are available in a wide range of sizes and styles that will fit any home and lifestyle, making them the ideal partner for your projector.

This unique, portable screen is easy to use and very stable with high quality alloy casing and self standing format. The Optoma Pull-Up is an ideal screen for travelling, whether it's from room to room or around the country.

Optoma MWL screens are available in both business presentation (4:3) and home cinema (16:9) formats. These screens are also ideal for rental companies when you're unable to mount a screen to the wall or a ceiling.

During use, two support legs which are otherwise hidden conveniently slide out from under the casing. The support legs come with height adjustable floor stands for use on uneven surfaces. For additional vertical stability, the support bar comes with an additional height adjustable floor stand.

The patented one-way lock allows the back support to be fully secure and easily adjustable. The multi-purpose handle is not only used for pulling and retracting the screen, but for securing the screen to the support bar too. This prevents the screen from falling or shifting positions.
