

16:9 Electric Aluminium Smart Control Projector Screens

One of the only screens on the market that has a built in IR Remote control. The screens aluminum casing also has an over-ride switch located at the end of the case. Depending on installation, both the built-in I/R and external infrared remote systems can be used.

Tubular motors are known to be quiet and noiseless, stable, and smooth. Raise and lower your projection screen smoothly and precisely with the touch of a button. The tubular motor is the heart of this motorized projection screen and will give you years of reliable and trouble-free operation.

EGA screens feature one of the best mounting systems on the market. Two small brackets fit to the wall or ceiling anywhere along the length of the case. Once the screen is clipped into the brackets a nylon lever secures it in position
