5-PORT 10/100 SWITCH

SILENT OPERATION
Fanless design provides noise-free operation

PLUG AND PLAY
Auto MDI/MDIX simplifies cable connections

COMPACT DESIGN
Stylish, compact design allows switch to be placed anywhere

AUTO-SENSING 10/100 PORTS
The DES-1005D uses auto-sensing 10/100 Mbps ports, allowing a small workgroup to flexibly connect to Ethernet and Fast Ethernet devices to create an integrated network. These ports detect the network speed and auto-negotiate between 10BASE-T and 100BASE-TX, as well as between full and half-duplex, allowing you to get the maximum speed possible for each device connected to your network.

AUTO MDI/MDIX CROSSOVER
All ports support automatic MDI/MDIX crossover, eliminating the need for crossover cables or uplink ports. Each port can be plugged directly to a server, hub, router, or switch using regular straight-through twisted-pair Ethernet cables.

FLOW CONTROL FOR SECURE TRANSMISSION
802.3x flow control on each port minimizes dropped packets when the port’s receiving buffer is full. This gives you a more reliable connection for all of your connected devices.
The DES-1005D 5-port 10/100 Mbps Switch is a 5-port 10/100 Mbps Fast Ethernet switch that allows you to quickly set up a wired network. Connect the DES-1005D to multiple computers together to share files and folders, or connect it to a router to share an Internet connection.
