

Two Way Digital Coax to Toslink Audio Converter Repeater

StarTech ID: SPDIFCOXTOS

This two way Digital Coax to Toslink Audio Converter Repeater lets you extend and convert digital coax audio to Toslink audio, or Toslink to digital coax.

This easy to use solution allows you to select the input signal you want to convert or extend, and outputs both digital coaxial and Toslink audio signals.

This digital coax to Toslink audio converter/repeater does not downgrade the audio signal, and provides an output signal that matches the quality of input audio, supporting 2 to 5.1 channel audio.

Applications and Solutions

- Another option you may choose is to run both output signals from one input. For example you may want to run a Toslink cable to one receiver and a digital coaxial cable to another receiver
- Convert or extend your audio input without signal or quality loss.
- SPDIFCOXTOS allows you to select one input signal (digital coaxial or Toslink) and convert or extend your output signal.

Features

- Compact and easy to install and use
- Input 2 to 5.1 channel audio. Output channels will always be the same as audio input channels
- Supports two way audio conversion: Toslink to digital coaxial or vice versa

Technical Specifications

- Warranty: 1 Year warranty
- Color: White
- Carton Quantity: 30
- Shipping (Package) Weight: 0.55 lb [0.25 kg]
- Audio Channels Supported: 2 - 5.1
- Input Connectors: 1 x Digital Coaxial RCA, and 1 x Toslink
- Output Connectors: 1 x Digital Coaxial RCA, and 1 x Toslink
- Power Adapter: 5V DC
