

3M Black Filters give 60° protection from either side.  
**Gold Filters protect from above, too!**

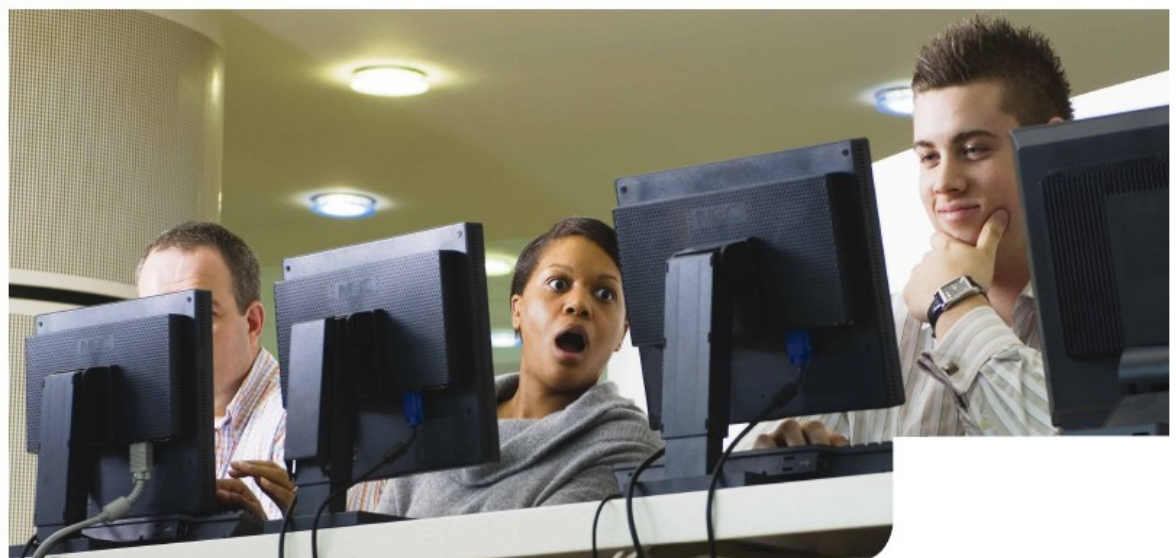

### Protect your confidential data with 3M Frameless 'Gold' Filters

3M Vikuiti Gold Filters provide nearly twice the effective privacy as traditional 3M Black options and provide 14% higher viewing clarity. The Gold filter also differs from the Black options by also protecting data from above as well as either side and displaying a Mirror-like reflective effect protecting confidential and private information from unwelcome eyes.

- Gold Micro-louver technology provides unique Mirror-like finish
- A unique attachment system means the filter can remain inside your laptop – even when closed
- Easily removable to allow for screen sharing when privacy not required
- LCD screen protection
