**Specifications**

- 3 Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.
- 4 HP recommends that the number of printed pages per month be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period.
- 8 Power requirements are based on the country/region where the printer is sold. Do not convert operating voltages. This will damage the printer and void the product warranty. Power consumption values typically based on measurement of 115 V device.
- 13 Not supporting Windows® XP (64-bit) and Windows Vista® (64-bit); Not all "Compatible Operating Systems" are supported with INBOX software, full solution software available only for Windows 7 and newer, Legacy Windows Operation Systems (Vista, and equivalent servers) drivers only. For Windows Server 2003 32-bit and 2008 32-bit/64-bit, 2008 R2 64-bit, 2012 64-bit, 2012 R2 64-bit only drivers (print/scan/fax) are installed. Windows RT OS for Tablets (32-bit/64-bit) uses a simplified HP print driver built into the RT OS. Linux systems use in-OS HPLIP software.
