

DYNPDU-6WS-H-SP-1U

SurgePro protected 6-Way Horizontal PDU

To Protect and to Serve.

Are you looking to protect your valuable Networking, IT or Telco infrastructure from damaging voltage surges? Need a low cost but effective solution for wide scale deployment that prohibits the usage of full scale UPS systems?

The new LMS Data **SurgePro** range of Voltage Surge protected Power Distribution Units (PDU) allow just that sort of protection for your equipment. Featuring the latest in Metal Oxide Varistor (MOV) technology, the **SurgePro** will block any input voltage surges up to around 4 times the nominal input voltage, meaning your IT Networking Switches, Servers, NAS devices and PBX devices will run for longer and thus reduce system downtime.

And there is more. Built into the LMS Data **SurgePro** series is a Ground (Earth) verification display which allows instant visual recognition of a correct Earth continuity for all your attached Equipment, ideal for Health and Safety compliance as well as reduction of RF values which may damage connected equipment.

Featuring.

Voltage Surge Protected Power Distribution

MOV (metal oxide varistor) Surge technology

TSD (transient suppression diode) Spike prevention

Earth Continuity system with LED confirmation

Surge system LED confirmation

Standard 19" ETSI Rackmount design

Standard UK type sockets; rated 13A; 6 Way

Protected neon On/Off Switch

Generous 1.8 approx. metre high-load UK cable
