

Acer Chromebox CX13

Chromebox CX13 combines robust performance with integrated security and ease of management, making it a great choice for all kinds of business. Extremely versatile, thanks to the compact design and extensive connectivity options this Chromebox works well as a media player, too.

- Up to 8th Gen Intel® Core™ i Processors
- Up to 16GB DDR4 Memory
- USB 3.1 Gen 1 Type-C™ Port
- Lightning-fFast 8-second boot up
- Easy to manage and deploy

Chromebox CX13 Highlights

Maximizing productivity

Powered by 8th Gen Intel® Core™ i processors and up to 16 GB of ultrafast DDR4 memory, Chromebox CX13 can easily take care of daily business tasks with speed and efficiency.

Powerful digital signage player

With digital signage solutions becoming increasingly popular, Chromebox CX13 can act as a media player to broadcast important information to employees or customers in hallways, lobbies, and passageways.

Easy to manage and secure

Easy to manage and deploy, Chromebox CX13 also comes with built-in security features protecting the device from malware and viruses. Chrome OS is regularly automatically updated so it always stays current and efficient.

Varied connectivity options

Plenty of connectivity options, including a USB 3.1 Type-C™ Gen 1 port, which allows ultrafast transfer of power and data and provides hi-res display output, enable users to connect all sorts of devices and boost their productivity.
