Lightning-fast 8-second boot up
Easy to manage and deploy

Acer Chromebox CX13

Chromebox CX13

Performance to get more done

Powered by cutting-edge components such as 8th Gen Intel® Core™ processors, up to 16 GB of ultrafast DDR4 memory and up to 64 GB SSD, Chromebox CX13 delivers the performance to improve your business productivity. Plus, with the operating system starting in less than 8 seconds you can access what you need in no time and finish tasks quickly. Chromebox CX13 is also packed with apps developed for productivity, including Docs, Sheets, Slides, Calendar, and communication apps such as Gmail and Hangouts.

Extensive connectivity

Chromebox CX13 offers a multitude of connectivity options, including a USB 3.1 Type-C™ Gen 1 port, which allows users to charge devices, transfer data or connect an external monitor with up to 4K resolution; several USB 3.1 or USB 2.0 ports (depending on the model); an HDMI port and a MicroSD card reader, making it easy to connect all sorts of devices. It also offers a Gigabit Ethernet port as well as fast and stable wireless connectivity via 2x2 MIMO 802.11ac Wi-Fi and Bluetooth 4.2 LE.

Perfect digital signage player

With digital signage solutions becoming increasingly popular, Chromebox CX13 can act as a media player to broadcast important information to employees or customers in hallways, lobbies, and passageways. Chromebox CX13 boasts a sleek, compact design that won't crowd even small desks, plus it can be placed flat, freestanding with the included base or tucked out of sight behind the display with an optional VESA mounting kit.

Easy management and built in security

Chromebox CX13 can be easily managed via the Chrome OS Management Console, which provides the capabilities and control organizations need to manage their fleet of Chrome devices. IT administrators can create user groups; pre-install and block apps; track assets; manage user access; configure network access and customise user features, and more. In addition to built-in security features, which protect the device from malware and viruses, Chrome OS is regularly automatically updated so it stays current with the latest fixes and features.

Operating System

- Google Chrome OS

Performances

- 8th Gen Intel® Core i7/i5 processors
- 7th Gen Intel® Core i3 processor
- Intel® Celeron processors
- Intel® UHD Graphics 620
